Here,I forget to put a space after a comma. I refer to **??** in the text, but I do not refer to the second one.

I can mention a filename such as `myfile.txt`; some rules don't apply to this special markup; however, if I write myfile.txt, I'm likely to get a warning about a period not followed by a space.

$4.3 \times 8.4 = fooa.b$

Something new could be detected by LanguageTool.
